Advanced Reporting Feature Enhancements for OneView

The Challenge Today

- Reporting lives as static CSV downloads on the team page

- Every download needs manual cleanup to fit your needs

- That process eats up time and adds frustration

Why We're Changing It

- We listened to your feedback! You told us static downloads aren't flexible enough

- We wanted a solution that feels interactive and almost real time

- Our goal: give you more control without extra busywork

What the New Reports Module Does

- Provides a catalog of standard reports you already know

- Lets you build graphs, dashboards and custom exports

- Enables you to save those custom views to your personal collection

How You'll Benefit

- View data in near real time instead of waiting on CSVs

- Tweak display settings on the fly to match your exact needs

- Export with fewer steps and less clean-up work

- Get a smoother, more intuitive user experience

Key Takeaways

- **New Reports Module:** Modio has launched a new Reports Module that offers improved data display, user experience, and real-time data access.

- **Enhanced Functionality:** The new module enables users to manipulate reports, create graphs and dashboards, and save customized views.

- **Data Parity:** The new module maintains data parity with existing reports, ensuring a smooth transition.

- **Benefits**: You can access data in near real time, tailor reports to your needs, and export data more efficiently.

The new module aims to simplify data handling, enhance workflows, and provide greater flexibility and functionality.
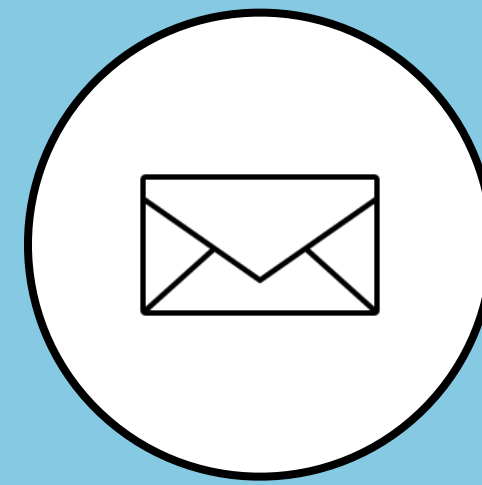

Next Steps & Support

- Log in and explore the new reports module today

- Keep an eye out for further enhancements rolling out soon

- As always, send feedback or questions our way
