

MEET THE NEW MODIO ONEVIEW LOOK AND EXPERIENCE

Our new optimized OneView 2.0 dashboard brings a fresh look and experience to credentials management. Built to save you time, you will now be able to manage your team of providers more efficiently and accurately than ever before. Everything you know and love about OneView is still here (including all your data) but our OneView 2.0 revamped technology will open access to new features and capabilities.

ONEVIEW 2.0 FEATURE HIGHLIGHTS

BULK LICENSE UPDATERS

Save time by running team state and controlled substance license updaters for up to 10 providers at once.

CUSTOMIZED CREDENTIALS DASHBOARD

Customize and resize your columns by selecting what you want to view or hide. This will help you maximize your screen-space and let you focus on exactly what you need to see.

SET IT & FORGET IT

Set alerts based on your own month range preference, meaning you can choose between a 1-6 month time frame for alert warnings.

SINGLE CLICK TO LICENSURE SITES

There's a new magnification glass icon next to every provider license which will direct you to its respective primary source verification site in a single click. This is designed for lightning fast real-time license verification.

SIMPLE DRAG & DROP

Drag and drop documents directly to a line item with the new auto-file feature. Files will now be sorted into the appropriate document library. These documents can still be accessed from the Documents tab.

CLICK & DIRECTLY EDIT TEXT

Directly click, edit, and add details to any line item without having to navigate into their respective credentialing sections. This will save you a ton of time since you can add credentialing information directly from one location.

ADDING NEW PROVIDERS

Easily add providers to your team with OneView's enhanced integrations with multiple trusted data sources like LexisNexus.

ADDITIONAL ONEVIEW 2.0 FEATURES

TAG IT!

Tag individual line items from the actions column to help with filtering and sorting.

ALERT PROMPTS FOR MISSING FIELDS

Receive alert messages if a required field is missing data when you're completing a line item.

DON'T USE IT? LOSE IT!

You can now remove sections that you don't need on your dashboard.

SIDE BY SIDE LICENSE HISTORY VIEWS

Customize and resize your columns by selecting what you want to view or hide. This will help you maximize your screen-space and let you focus on exactly what you need to see.

RED FLAG RISKS

Bring attention to at risk items by adding flags and further filtering as needed. Rows will now be highlighted in red when flagged.

GROUP ALERT ACTIONS

Eliminate a ton of clicks and save time with this new feature which lets you enable or disable alerts for up to 10 providers at once.

DOWNLOAD AND GO REPORTING

Export reports to Excel, CSV, or PDF files and quickly navigate to the compliance report with quick built in links.

QUICKER FILE EXPORTS

Download your providers' most recent and archived documents directly from any available line item. Also access all your providers documents in one place.

EXPANDED TEAM VIEWS

Have multiple providers with multiple licensures? You can now load more items at a time without having to navigate to the next page.

LIVE CHAT

Your trusted Live Chat will still be available in our OneView 2.0 Beta.
